The author analyzes the present spotty pattern of areal
development of the Northeast around isolated mining
districts extracting gold, tin, tungsten, diamonds, and
other minerals, separated from one another by vast
virtually uninhabited territories where fishing, reindeer
raising, and trapping are the principal economic activi-

DESCRIPTORS: *Direct current, *Electric fields,
Distortion, Model tests, Electrical conductance,
Spheres, Electric potential.

The distortions of the electrical field of direct current
caused by a continuous body are compared with those
caused by a hollow one. By introducing effective con-
ductivity there are given criteria for the equivalence of
distortions. (Author)
